Welcome to the Summer '99 edition of the Rainbow List.

In this directory, you will find an assortment of individuals, businesses and organizations who support our community and its goals. However, one of the most frequent comments we receive is that one or another of our advertisers is not gay or lesbian.

The fact is, we don't know how many of the listers are lesbian or gay - we don't ask. We only ask that our listers support the goals of our community, want members of our community as customers and treat their lesbian and gay customers with the same or better respect as their non-gay customers. We don't hesitate to eliminate the ones who don't.

The concept of judging people on the basis of their sexual orientation or lifestyle is contrary to the greatest goals of our community; our judgment should be strictly on the basis of their acceptance and support of our lifestyles. While the thought of testing some of our listers for gayness is indeed tantalizing now, even I would not have passed the test until I came out at about age 30.

This double standard within our community has done more damage to the gay rights movement than the radical christian right could hope to do. If we accept that less than half the population is gay or lesbian, we have to realize that some non-gay people have been necessary to make the strides we have made in this democracy and they will be vital in reaching our future goals.

We hope you will enjoy this edition of the Rainbow List. Please support the listers in this directory regardless of their sexual orientation.

Ric Turley
Publisher

There is still no cure for AIDS.

Infection is easily prevented by avoiding unsafe sex. Unsafe sex is when certain body fluids (semen, vaginal fluids, feces and blood) get from one person into the body of another.

Protecting yourself from sexually transmitted diseases is your responsibility. Don't risk your life on the word of someone else, no matter how cute he or she is. Protect yourself and only play safely!
